EDUCATION

BSc Computer Science, Cardiff University

September 2024 – June 2028

- Year 1: **1st class** in all modules
- **Relevant Modules:**
 - **Human-Computer Interaction** (User research, usability testing, interaction design) – 80%
 - **Software & Web Development** – 94% (UI development, web applications)

International Baccalaureate Diploma Programme, Indus International School

August 2022 – May 2024

- Score: 31/45 | Higher Level: Computer Science, Economics, Business.
- Awarded : **Top in Math AI** (Standard Level).

TECHNICAL & DESIGN SKILLS

UX & Product Design (User research, usability testing, wireframing, interaction design, accessibility awareness)

Programming & Web Development (Python, HTML/CSS, JavaScript, Flask, Android Studio)

Data Analysis for User Insights (Python (Pandas, NumPy), SQL (MySQL, SQLite), data exploration and trend analysis)

Design & Visualisation Tools (Figma, Axure, Lucidchart, Matplotlib, Tableau, PowerBI, Excel)

Tools & Collaboration (Git, Microsoft Office, Agile teamwork, documentation)

RELEVANT PROJECTS

Human-Computer Interaction Project: Outlook Auto-Reply Interface Design | Axure, Excel, Heuristic Evaluation

- Designed interactive UI prototypes using **Axure**, applying established usability guidelines and interface design patterns, keeping user accessibility in mind.
- Applied core HCI principles including **Fitts's Law**, **Gestalt Principles**, and user-centred design practices to improve interface efficiency and usability.
- Conducted **heuristic evaluation** as part of a group project, systematically identifying usability issues using a structured Excel-based evaluation framework.
- Analysed and documented usability findings, prioritised issues based on severity ratings, and proposed design improvements.

Gained experience in **Project Management**, UX evaluation methods, usability analysis, collaborative research, and technical report writing. Received High First Class grade **(82%)**.

E-commerce Website | UX & Web Development (Flask, JavaScript, SQLite)

- Designed an intuitive product browsing experience with sorting, filtering, recommendation to help users quickly find relevant items.
- Mapped **user flows and use cases** to structure key interactions.
- Developed an interactive shopping cart with real-time price updates and easy item removal to improve usability.
- Implemented a user-friendly checkout process with clear validation feedback for required fields and payment details. (**multi-user session handling**)
- Added user reviews, search functionality, and personalised product suggestions to enhance engagement and decision-making.

Received High First Class grade **(94%)**.

Wireframe for my Android App | (Android Studio, Java, XML, Junit Testing)

Personal Project

- Developed my own UX designs for my android application using XML, Figma and other tools
- Ensured UI consistency **across all standard Android screen sizes** and densities
- Took responsibility including gathering requirements, kept a **customer-first mindset**.
- Tailored minute UX features using the gathered information - e.g. Logo creation for user interface.
- Ensured all elements are carefully saved without any pixel breakage in the APK file.

RELEVANT VALUES & SKILLS

- **User Centered Design & Communication:** Able to clearly communicate and empathise with customers and colleagues which is helpful in requirements gathering and UI experience sharing.
- **Team Work & Collaboration : Empathetic**, understanding priorities and working towards aligned objectives as a team, encouraging **diversity of thinking**; Experienced in team-based projects using version control workflows to coordinate seamlessly.
- **Autonomy & Time Management:** Balanced academic achievement (First Year: **86%**), a **10-hour-per-week** part-time role, and independent projects, consistently meeting all deadlines.
- **Analytical & Problem-Solving:** Strong ability to analyse and design solutions, with proven experience in algorithm efficiency (e-commerce product recommendation).
- **Continuous learning** : commitment to continuous learning; independently learned additional tools like Docker and OpenShift to support project deployment within deadline.

EMPLOYMENT HISTORY

Restaurant Staff, Kootaan (Cardiff)

December 2024 – April 2025

- Improved customer satisfaction and received **positive reviews** by demonstrating strong empathy.
- **Analysed sales trends** to contribute menu and discount **strategies**.
- Coordinated stock management using digital tracking, reducing waste and ensuring **100% compliance with safety standards**.
- *Pressured env*

VOLUNTEERING

Mathru Foundation, Sarjapur (India)

- Volunteered with physically disabled individuals in rural India, teaching them to use online tools to develop skills and access opportunities.
